Access-conditioned decision audit

Schematic glyphs

a Frozen inference & access

Discovery
4 cohorts · n=224
Probability-only

Locked
Dreyer · n=87
Prespecified test

Protected
Stieger · n=62
90 registered units

Target EEG

EEGNet

EEG-Conformer

Scores

Separate audits

Frozen · no retraining / reselection

Non-anticipating
At the score layer
Source-only | Prefix/suffix
Strict-past | Session-fwd

Complete batch
All target scores
Transductive reference
Not online

Label-informed
Scores + labels
Oracle diagnostic
Not deployable

Compare within each access contract

Protected prefix: **MIXED** · below the 2-pp gate

b Protected prefix protocol

Raw-BN

Freeze policy

First 10: fit

Suffix: test

Unlabeled

Labels: eval only

c Decision decomposition

G_A = L_{decision} − L_A

G_A: BA gain

L_{decision}: Default loss

L_A: Signed residual

Same trials · label-informed oracle

d Participant summary

Within each backbone

5 conditions × 3 seeds

Participant mean

62 participants Summary

Raw-BN: 30 of 90 registered units
